

FIBER TO THE BUILDING (ON-RAMP)

The Gold Standard for Internet, Voice and Data Network Solutions

Network demands from voice/data/video, SaaS and cloud-based applications are driving higher bandwidth requirements for businesses. Alpheus fiber is the gold standard for delivering high-performance broadband and telecommunications services with unmatched reliability.

Alpheus' Fiber to the Building services take advantage of our 6,000+ route miles of Texas fiber and seven data centers to quickly connect businesses to the Internet, develop customized networking solutions and implement private, public or hybrid cloud applications.

Packaged **FOR SUCCESS:**

Alpheus fiber is already connected to more than 300 COs (central offices) and Carrier POPs (point-of-presence) throughout Texas. Using these COs/POPs as aggregation points, Alpheus can extend fiber quickly and easily to buildings, offering specially-priced service packages.

- **Internet Access:** From 50 Mbps up to GigE speeds.
- **Internet & Voice:** Internet access and SIP Trunking with unlimited long distance calling.
- **Internet, Voice & Data Center Colocation:** High-performance and resilient network infrastructure for VPN and cloud solutions, includes the option of a half or full cabinet at any Alpheus' data centers.
- **Internet, Voice, Point-to-Point Line & Data Center Colocation:** A half or full cabinet at Alpheus' data center, private/dedicated fiber connection to your server, high-speed Internet access and SIP Trunking with unlimited long distance calling.

The Alpheus **ADVANTAGE:**

- Alpheus service bundles offer the most competitive pricing in the industry.
- Predetermined pricing for Near-Net buildings.
- Resilient and high-quality fiber optic network delivering performance unmatched by legacy copper and cable infrastructure.
- Flexible interfaces including 10/100 FE, GigE and 10 GigE.
- Alpheus is the Texas specialist with our network optimized for reaching all major markets.
- Dedicated customer account managers for trouble-free installation and on-going customer care.
- Superior technical support with our 24x7x365 world-class Network Operations Center (NOC) staffed by certified technicians.
