

## LONG HAUL DATA TRANSPORT

*Metro, Regional and Long-Haul Services*

**We're focused on Texas, but can connect you to anywhere.** When your company's data transport needs extend past your metro area, Alpheus' fully-owned fiber optic network has you covered in every major Texas market—Dallas-Fort Worth, Houston, San Antonio, Austin, Corpus Christi and the Rio Grande Valley. Need to go further? Through our carrier partners, we can provide long haul services to virtually anywhere, bridging your distant networks for a complete and seamless data solution.

### Leverage Alpheus' **LONG-HAUL TRANSPORT SERVICES** to:

- Achieve end-to-end connectivity, across the state or across the country.
- Secure business continuity through redundant data centers in two or more geographic areas.
- Eliminate the need to work with multiple network vendors in various markets.

### The Alpheus **ADVANTAGE**:

- **Superior reach:** We provide interconnectivity with more than 300 central offices and carrier POPs, and can connect to more than 88,00 Metro-E qualified buildings.
- **Scalability:** Bandwidth speeds ranging from DS-1 to OC-192.
- **Flexibility:** Point-to-point or point-to-multipoint configurations; diverse transport solutions over Ethernet, managed wavelengths and wireless.
- **Unmatched reliability:** Our fully redundant core network architecture, monitored by our own network operations center (NOC), enables uptime performance that exceeds 99.999%.
- **Professional support:** Our team is on call 24/7 to answer your questions and resolve any issues with the urgency your business deserves.
