

# METRO ETHERNET SOLUTIONS

## Ethernet Virtual Private Line (E-Line) Service

Ethernet Virtual Private Line services offer a simple and cost-effective way to create high-bandwidth connections between multiple locations in the same city or leverage Alpheus' core fiber network for inter-city connection. Alpheus' extensive metro coverage to key Central Offices and Carrier POPs lets you connect to all locations with ease.

Whether you're creating a first-time connection or upgrading from a legacy TDM circuit, E-Line provides the quality of service, bandwidth efficiency and security your business needs to stay one step ahead of the competition.

### Leverage Alpheus' E-LINE SERVICE to:

- Establish an Ethernet Virtual Connection (EVC) between two locations (point-to-point) or multiple locations (point-to-multipoint) in a single metropolitan area.
- Replace a legacy TDM circuit with E-Line and benefit from enhanced capabilities and ease of use.
- Achieve greater information security compared with public Internet solutions.
- Control capital and operating expenses, due to lower cost of Ethernet interfaces.

### The Alpheus ADVANTAGE:

- **Fast provisioning:** Metro Solutions is quick to set up and allows for easy addition of new sites.
- **Two interface options:** Choose between Fast Ethernet or Gigabit Ethernet (GigE).
- **Scalability:** Upgrade easily with bandwidth options from 3Mbps to 1Gbps.
- **Predictable performance:** Our fully-owned fiber network provides quality you can count on.
- **Simplified optimization:** One price and three unrestricted Class of Service tiers (Gold, Silver, Bronze) makes prioritizing your data traffic refreshingly uncomplicated.
